

# STOUGHTON®

## INTERMODAL CHASSIS WITH REAR IMPACT GUARD

First to Earn the IIHS **TOUGHGUARD®** Award for an Intermodal Chassis

## BUILT STRONGER. BUILT SAFER.

### SAFETY THAT SETS THE STANDARD

Stoughton Trailers is the first and only trailer manufacturer to earn the IIHS **TOUGHGUARD®** award for an Intermodal Chassis. Applies to Stoughton's 53-ft Intermodal Chassis built after April 2025 and solidifies our leadership in advancing trailer safety and innovation.

- Meets rigorous underride crash standards.
- Reinforces our commitment to protecting the motoring public.

### WHY TOUGHGUARD® MATTERS

- **Proven Protection:** Meets the most rigorous IIHS safety standards for rear impact protection in rear-end collisions.
- **History of Leadership:** Stoughton earned its **TOUGHGUARD®** for dry van and refrigerated trailers in 2017—and now sets the bar again with Intermodal Chassis.
- **Commitment to Safety:** Protecting the motoring public remains a top priority in every design decision we make.

# INNOVATIVE ENGINEERING

Designing an underride guard for an Intermodal Chassis presented unique challenges. Unlike dry van, refrigerated or flatbed trailers, Intermodal Chassis lack a continuous frame to support the guard. Stoughton engineers developed a new impact guard system with:

- Angled supports extending from the guard's outer edges to the chassis rails.
- Reinforced vertical supports on each side deliver greater structural strength.
- Integrated support system absorbs impact energy and helps block underride.

## Built for Today's Freight

With global trade increasingly reliant on containerized freight, Stoughton ensures fleets have equipment that is not only durable and efficient but also designed with safety innovation at its core.

- Manufactured on dedicated lines in Stoughton and Evansville, Wisconsin, and Waco, Texas.
- Backed by one of the largest chassis

production capacities in North America.

- Built to deliver long-term value and superior protection.

## Commitment to Safety

Stoughton's investment in safety innovation continues to raise the bar for the entire industry. With the award-winning rear impact guard, our 53-ft Intermodal Chassis delivers the performance fleets demand and the protection the public deserves.
